

StormSaver Rainwater Harvesting System

- 
- Low voltage 24V system only using 90W compared to 800W of other systems.
 - Can connect to a battery from a PV if client wants to operate off grid.
 - Low noise levels in the pump.
 - Concrete surround is not required for the tank, minimising costs and more environmentally friendly.
 - 25 year guarantee on the tank.
 - Tank is light and easy to manoeuvre (easily lifted by two persons).
 - Low invert levels across the shallow dig tank.
 - Tank and pre tank filter all pre-fitted within the tank so not having to fit separate filters.
 - Minimum cover over tank 400mm.
 - Tank can be installed under driveway provided that the vehicle duty cover is purchased.
 - Easy to self install.
 - Self commissioning.
 - Self priming pump.
