# GROUND GUARD UNDERGROUND DRAINAGE SYSTEM

FloPlast's Ground Guard is a linked paving system, manufactured from Polyethylene, that provides a durable safe and eco-friendly surface for grass reinforcement, ground stabilisation and gravel retention.

The robust system is certified for loads up to 200 tonnes per m<sup>2</sup>, making it ideal for driveways, parking areas, residential lawn parking, walkways or paths, disabled access routes, golf buggy paths, paths and shed bases.

Ground Guard is 90% porous, providing effective drainage of surface water and saving cost on unnecessary drainage installation.

Ground Guard filled with grass or gravel provides a rainwater run off that is compliant as a SUDS source control.

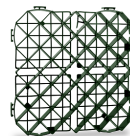

#### Features and Benefits:

- Offers unimpeded flow to surface water.
- Product design ensures easy handling and installation.
- Tiles interlock with an easy clip-together design.
- Tiles can be shaped or cut for irregular edging.
