## **RAINWATER DIVERTER INSTRUCTIONS**

Rainwater

Diverter

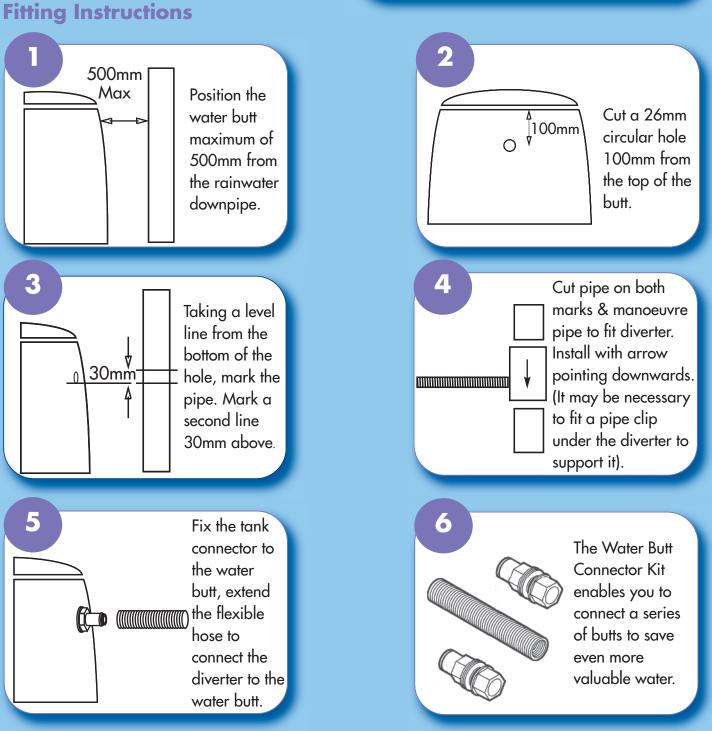

Flexible Hose

Tank Connector

The Rainwater Diverter channels rainwater from the downpipe into the water butt. When the butt is full, the design allows excess water to bypass the diverter outlet and continue down the pipe.

## **Key Benefits**

- Collect rainwater from your downpipe
- Save water, money and the environment
- Prevents water overflow from the water butt
- Fits 65mm Square and 68mm Round Downpipe
