

● FloPlast Tees and Elbows (30-116mm diameter)

Plumbing Range - Ideal for emergency repair or replacements, **FloPlast** Tees and Elbows connect all common domestic pipes quickly and easily without the need for special tools or fittings

Introduction

FloPlast Tees and Elbows connect all common domestic drain, waste and vent pipe systems. Manufactured from a durable Thermoplastic compound, **FloPlast** Tees and Elbows come in four sizes and can fit all common pipe materials including cast iron, steel, plastic, copper and lead.

End clamps are provided as standard in corrosion resistant 300 grade stainless steel.

1.4401 (316) stainless steel end clamps are available upon request.

Benefits

- Quick and easily installed by tightening the stainless steel clamp
- No special tools required to install Tees and Elbows
- Extra length and flexibility provides compensation for shortened pipes
- Ideal for emergency repairs
- Provide a watertight seal
- Fernco range can be applied to many pipe materials
- Ideal for working in confined spaces e.g. under a bath or shower tray

Applications

FloPlast Tees and Elbows are used to replace fittings cut out at the joint during alteration or repair

- Can be applied to all common household drain, waste and vent pipes
- Used for emergency repairs
- Make new connections to existing pipe work
